- Timo van Hoven (TH)

The profile of Roy Kooie shows contact information and organization details.

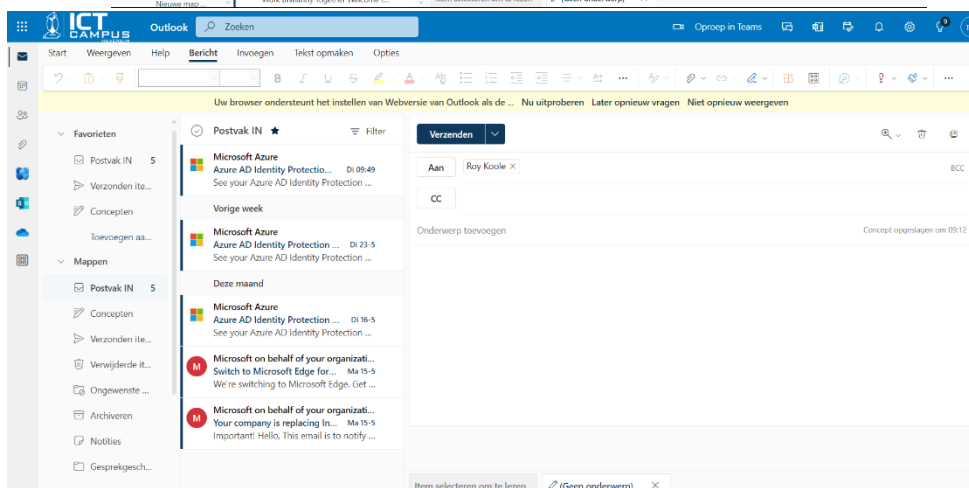

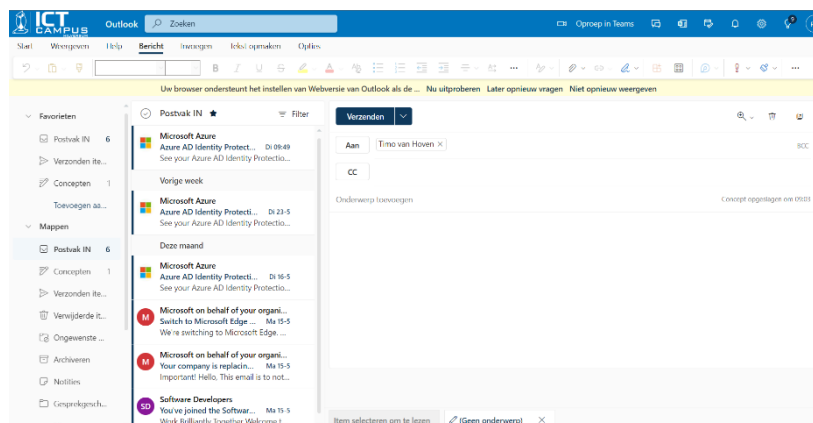

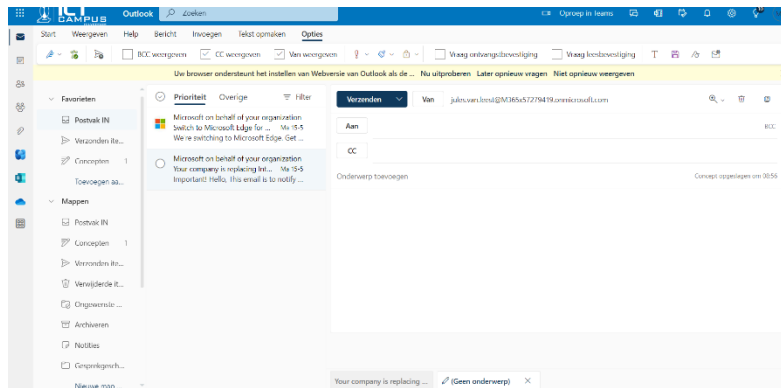

Manage mailbox delegation

The Send as permission allows the delegate to send an email from this mailbox. Message will appear to have been sent from this mailbox owner.

Outlook interface showing the 'Add members' button and the 'Delete(0)' button. The '1 items' button is also visible. The search bar is empty. The 'User Principal Name' field is visible, showing:

- Jules van Leest (JL) jules.van.leest@M365x57279419.onmicrosoft.com

Teams admin center

The screenshot shows the Microsoft Teams admin center interface. On the left is a navigation pane with categories like Teams, Users, and External access. The main content area displays the 'Members' tab for a team named 'Erica'. At the top, there's a card for 'Erica' with a profile picture, a 'Team members' badge, and links to 'Open in Teams' and 'Send email'. Below this is a table of team members:

Display name	Username	Title	Location	Role
AH Abdalla Hassan	abdalla.hassan@M365x57...	-	-	Member
CV Coen Verhaaff	coen.verhaaff@M365x572...	-	-	Member
JV Jarno Vos	jarno.vos@M365x5727941...	-	-	Member
TH Timo van Hoven	timo.hoven@M365x57279...	-	-	Owner

The screenshot shows the 'Guest access' settings page in the Microsoft Teams admin center. It explains that guest access allows people outside the organization to access teams and channels. A toggle switch for 'Allow guest access in Teams' is currently set to 'Off'. At the bottom, there are 'Save' and 'Discard' buttons.

Microsoft 365 Defender | Email & collaboration | Attack simulation training

The screenshot shows the Microsoft 365 Defender Attack Simulation Training interface. It has a left-hand navigation pane with steps: Select Technique, Name Simulation, Select payload and login page, Target users, Assign Training, Select end user notification, Launch Details, and Review Simulation. The main content area is divided into three sections:

Select Technique

Select the social engineering technique you want to use with this simulation. We've curated these from the MITRE Attack framework. Depending on your selection, you will be able to use certain types of payloads.

- ☒ **Credential Harvest**
In this type of technique, a malicious actor creates a message with a URL in the message. When the target clicks on the URL within the message, they are taken to a web site, the website often...
[View details of Credential harvest](#)
- ☐ **Malware Attachment**
In this type of technique, a malicious actor creates a message with an attachment added to the message. When the target opens the attachment, typically some arbitrary code such as a macro...
[View details of Malware attachment](#)
- ☐ **Link in Attachment**
In this type of technique, which is a hybrid of a Credential Harvest and Malware Attachment, a malicious actor creates a message with a URL in an attachment, and then inserts the attachment into the message. When the target opens the attachment, they are represented with a URL in the actual attachment...
[View details of Link in attachment](#)
- ☐ **Link to Malware**
In this type of technique, a malicious actor creates a message with an attachment added to the message. However instead of directly inserting the attachment into the message, the malicious actor will host the attachment on a well-known file sharing site, such as SharePoint, or Dropbox and insert the URL to the attachment file path...
[View details of Link to malware](#)
- ☐ **Drive-by URI**
